"Con l'idea, con il suono e con il gesto, al *duende* piacciono i bordi del pozzo in lotta con il creatore. Angelo e musa scappano con il violino o il ritmo, e il *duende* ferisce, e nella cura di questa ferita che non si rimargina mai risiede l'insolito, quanto c'è di inventato nell'opera di un uomo."

- Federico García Lorca, 'Gioco e teoria del duende' (1933)

* Altezze e durate delle note indicate per i glissandi di armonici su corda vuota di violino (bat.127-132) e violoncello (bat. 133-134) sono indicativi. Da eseguire liberamente, non misurati.

** Strisciare le unghie sulla parte superiore del mantice aperto, poi percuotere con i polpastrelli o il palmo la parte mediana del mantice aperto (notazione a '*') e infine eseguire l'ultimo colpo di nuovo sulla parte superiore del mantice aperto (notazione a 'x').
