Notes

Scialoje altre is dedicated to *Azione Improvvisa*.

1 General aspects

Scialoje altre is a set of 8 pieces composed starting from the analysis of short poems dedicated to animals by Toti Scialoja, and exploiting surprising phonological patterns. The set is written for electric guitar, accordion and theorbo. The pieces are mostly textural/harmonic studies. Dynamics are mostly implicit, as they depend on theorbo's harmonics. Performers should play as *forte* as possible while –crucially– ensuring a homogeneous level between all notated elements. In each piece, dynamics might change depending on phrasing, providing that all elements are clearly present.

2 Total duration

Total duration is approximately 9'18".

3 Notes on instruments

Electric guitar: electric guitar uses substantially only natural harmonics and open strings. In order to keep harmonics resonating, a sustained tone, with some distortion/saturation and reverb, should be used. The player should ensure that the harmonic content emerge as clearly as possible.

Accordion: all single notes and slurred groups are always to be played with *messa di voce*, that is <>. In cases in which there might be a conflict between the two hands, the solution is left to the interpreter. Notes with *marcato* are to be played with standard attack and a short diminuendo at the end. Timbre is always *flautando*, in order not to mask harmonics in the plucked string instruments.

Theorbo: all attacks are intended to be *marcato*. Tuning is shown in Figure 1.

Figure 1 Theorbo string setup.

In *Elefante*, as the piece was written before, a slightly different tuning is required.

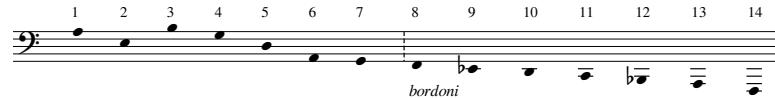

Figure 2 Theorbo string setup for *Elefante*.

4 Notation

Accidentals are notated in the standard way: they are to be applied for the whole measure, unless indication.

Stringed instruments: harmonics are notated as they sound, with string/fret indication on top. Indications are present only on first occurrence of the harmonic, assuming to be repeat over the piece (unless further indications). Alternative positions may be found by the performers, with the aim of simplifying performance or enhance harmonic content.

Electric guitar: special indications (in *Elefante*) are **h.o.** (*hammer-on*) and **p.o.** (*pull-off*): in both cases, there is one strumming in the right hand/pick for all the notes in the left hand (h.o. is upward on the fret, p.o. downward).

5 Amplification

color sciacallo allunga il muso nell'aiola
strappandola coi denti mi procura una viola
